GO BP Enrichment — Up−Regulated DEGs
(BALB/c & C57BL/6, Top4 per group −> 19 unique terms)
BALB
C57
rhythmic process
response to virus
response to type II interferon
response to protozoan
response to interferon−beta
regulation of innate immune response
positive regulation of innate immune response
immune response−regulating signaling pathway
immune response−activating signaling pathway
entrainment of circadian clock by photoperiod
defense response to virus
defense response to bacterium
circadian rhythm
circadian regulation of gene expression
cellular response to interferon−beta
cell killing
nuclear division
nuclear chromosome segregation
chromosome segregation
